Commentary: ~~Outside~~ ~~from~~

Calibration: ~~without~~ Outside, without

We measure the depths at the opening of the magnet. field applied:  $B = 0.02 \text{ mT}$   
field applied:  $B = 0.111 \text{ mT}$

Specifications of coil

$$2x \left\{ \begin{array}{l} N=480 \quad R \approx 1.1 \Omega \\ Z=8 \text{ mH} \quad (\text{max. } 10 \text{ A}) \\ I=3.5 \text{ A} \end{array} \right\} \quad \Delta$$
